A small fashion drop, made to feel deliberate.

Unrulled turns a supplied monochrome storefront reference into a complete original commerce experience. The useful composition survives; the branding, copy, code, people, garment artwork, behavior, and asset set are new.

Project abstract

Browser strategy: semantic content is readable without animation. Backdrop blur, pointer lighting, scrolling tickers, and observer reveals are progressive enhancements. The reduced-motion preference collapses non-essential movement. Desktop and 390-pixel mobile layouts are visually validated.
